PROFESSIONAL SUMMARY

Game Developer with 4+ years of experience building HTML5, casual, casino, and real-time multiplayer games using TypeScript, JavaScript, PixiJS, and Node.js. Shipped production titles across slot, keno, card, and fish genres, with strong ownership of core game logic, multiplayer backend architecture, and lobby systems. Currently at Paytm, contributing core game logic (frontend + backend) for a Poker game alongside web product work. Experienced end-to-end — from game mechanics and rendering to server-side real-time synchronization.

TECHNICAL SKILLS

- **Game Development:** PixiJS, HTML5 Canvas, slot / keno / card / fish / casual game logic, paytables, reels & paylines, animations
- **Multiplayer & Real-time:** WebSockets, real-time state synchronization, multiplayer backend architecture, lobby systems
- **Languages:** TypeScript, JavaScript (ES6+), HTML5, CSS3
- **Backend:** Node.js, Nest.js, REST APIs, BFF (Backend-for-Frontend)
- **Frontend:** React.js, Next.js, responsive UI, component architecture
- **Tools & Practices:** Git, GitHub, npm, Agile/Scrum, debugging, performance optimization

PROFESSIONAL EXPERIENCE

Paytm *Jun 2025 – Present*

Senior Software Engineer

- Core game logic developer for a Poker game at Paytm — handling both frontend and backend, including game rules, hand evaluation, turn flow, and multiplayer synchronization.
- Working in parallel on Paytm's Insurance vertical (Motor & Health) — developing frontend with React.js / Next.js and building BFF services in Node.js / Nest.js.
- Resolved production bugs and contributed to a 2–3% reduction in defect/drop-off rate across flows.

Gameium LLP *Jun 2023 – Jun 2025*

Game Developer

- Designed and implemented core game logic for casino titles including slot, keno, and card games.
- Built multiplayer games end-to-end — handling backend (Node.js) and frontend (PixiJS / TypeScript) responsibilities.
- Developed lobby systems integrating multiple casino games (slot, keno, fish, card) into unified products.
- Optimized rendering performance and network communication to deliver smooth real-time gameplay.
- Collaborated with designers and artists to integrate assets and animations into production-ready games.

Gamixlabs *Nov 2021 – Jun 2023*

Game Developer

- Developed casual HTML5 games and multiplayer titles using JavaScript, TypeScript, and PixiJS.

- Implemented core mechanics, UI flows, scoring systems, and animations for multiple casual game releases.
- Contributed to architecture and core logic for multiplayer game features, including real-time state handling.

KEY PROJECTS

Paytm Poker — Multiplayer card game at Paytm

- Core game logic developer (frontend + backend) — implementing game rules, hand evaluation, turn flow, and multiplayer synchronization.
- Contributing to real-time gameplay systems and game state management across players.

Cosmos Slot Games — Casino game suite (slot, keno, fish, card)

- Developed the lobby and built slot and fish game modules end-to-end using PixiJS and TypeScript.
- Integrated multiple game types under a unified casino experience.

Boomwins — Casino games platform (slot, keno, fish, card)

- Delivered lobby development alongside slot and fish game implementations.
- Worked on game flow, UI, and integration across multiple casino titles.

Poker Texas Hold'em — Card-based multiplayer game (Gameium)

- Core logic developer for both backend and frontend — game rules, hand evaluation, turn flow, and multiplayer synchronization.
- Built real-time state management across multiple players using Node.js and WebSockets.

Fish Game Multiplayer — Real-time multiplayer shooter

- Implemented core game logic on backend and frontend — real-time state, collision detection, and reward distribution.
- Built networking layer for synchronized multiplayer gameplay.

Video Poker — Slot-style casino game

- Built core logic, paytable evaluation, and complete gameplay flow.

Slot Game Framework — Reusable slot engine in PixiJS

- Built a configurable framework supporting reels, paylines, symbols, and animations — enabling rapid development of new slot titles.

Crossword Jigsaw & Quoteit — Casual / word-based games

- Core logic developer — puzzle generation, validation, progression, and scoring systems.

Paytm Motor & Health Insurance — Web products at Paytm (parallel work)

- Frontend (React.js, Next.js) and BFF (Node.js, Nest.js) development for Paytm's Motor and Health Insurance products.

EDUCATION

B.Tech, ABESIT College of Engineering *2022*
Graduated with 78.5%

STRENGTHS

- Strong problem solver with a focus on clean, maintainable game logic.
- Comfortable across the full stack — game client, server, and networking.
- Collaborative team player who enjoys turning design and art into polished, shippable games.

INTERESTS

Game development, reading tech blogs, and traveling.
